

## Welcome Neighbour!

True to its iconic location, Treehouse London is the gateway to everything British. We're perfectly perched across the street from the BBC and a stone's throw from the movers and shakers on Regent Street and Bond Street. All Treehouse rooms are perched high in the city skyline and feature big bay windows that look out to some of London's most iconic landmarks.

## SUSTAINABILITY AT TREEHOUSE

### Reduce, Reuse, Recycle...

No single use plastic is used throughout the hotel.

All amenities in our guestrooms are refillable and wrapped in recycled materials.

Furniture and timber is re-purposed, pre-loved and up-cycled to create a quirky decor.

Locally sourced, seasonal produce at the heart of food and drink programme.

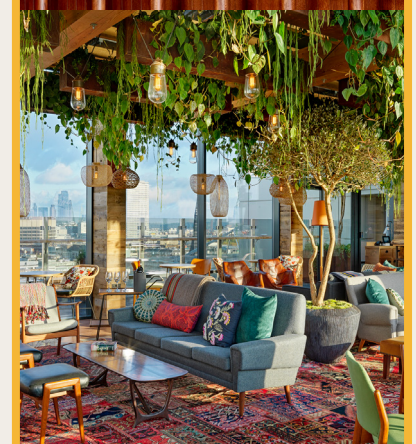

All showers are water efficient, using a lower flow than the average use, without impacting the shower pressure.

Food digester machine is used in our back of house creating zero food waste.

Eco-cleaning is used for our linen in the guestrooms, changing only every 3 days for our long stay guests (unless requested otherwise).

Zero-waste programme 'FoodPrint' implemented in the hotel to reduce our carbon footprint.

We have a living pollinating wall, along with a bee hotel for all of our busy bees looking after our eco system!
